

**The B-Word (biting)**

It's important to realize that biting is a developmental stage that is not unexpected. We cannot guarantee that your child will not be bitten during his/her time in care.

If your child was bitten we will always do an incident report so that you will know how it happened, when it happened, and if any first aid was given. If the skin is broken we will always call and let you decide if your child needs medical treatment.
